Smart Carbon Farming

Driving an inclusive agricultural transition to grow resilient, future-proof farms

Join us to explore Smart Carbon Farming!

The Smart Carbon Farming project connects 11 partners across 5 countries to drive an inclusive agricultural transition by customising and testing monitoring solutions, aligning policy, research and innovation, and training farmers on the uptake of carbon farming practices.

Farmers

- Improve soil health
- Gain fair compensation
- Amplify your impact

How?

Join us as a pilot farming partner or join our free training programme!

Investors

- Ensure credibility
- Leverage proven methods
- Invest in innovation with impact

How?

Get in touch to explore how you can invest in impactful carbon farming!

Solution Providers

- Educate and empower
- Grow your client base
- Contribute to global change

How?

Join an introductory session to see how we connect farmers with experts!

Policymakers

- Tackle regional challenges
- Secure financial support for farmers
- Promote incentive-driven change

How?

Attend an SCF policy briefing to explore funding and regulatory options!
